Career Objective:

Front-End Web Developer dedicated to crafting visually engaging, high-performance websites. Skilled in modern web technologies and responsive design, ensuring seamless user experiences across all devices. Focused on writing clean, efficient code to bring creative ideas to life.

Skills:

- **Frontend:** HTML, CSS, JavaScript, React, Tailwind CSS
- **Backend:** Node.js, Express.js, Firebase
- **Database:** MongoDB
- **Tools:** Git, GitHub, Vite, VS Code, npm, Postman
- **Interpersonal:** Quick learner, detail-oriented, adaptable, strong time management.

Projects:

1. **MediCamp (**Medical Camp Management System)   **Live | Client | Server**
   Key Features:
   - Participants can register for the camp by filling out a simple form on the details page.
   - Secure payment processing via Stripe for camp registration fees.
   - Organizers can manage profiles, camps, and track registrations/payments.

   Technologies Used: React, Tailwind CSS, Firebase, Express.js, MongoDB

2. **Chill Gamer (**Game Review Platform)   **Live | Client | Server**
   Key Features:
   - Users can rate and review games based on their personal experience.
   - Users can view, update, and delete their reviews.
   - Users can add games to their watchlist and easily access their favorite ones.

   Technologies Used: React, Tailwind CSS, Firebase, Express.js, MongoDB

3. **Volunary** (Volunteer Management)   **Live | Client | Server**
   Key Features:
   - Users can create volunteer posts and also update or delete their own posts.
   - Track the number of volunteers needed for a post.
   - Search and sort posts by title, deadline and volunteer count.

   Technologies Used: React, Tailwind CSS, Firebase, Tanstack Query, Express.js, MongoDB.

Education:

- Diploma in Computer Technology **|** Chapainawabganj Polytechnic Institute   *2020 - 2025*
